Regular State employees subject to promotion/demotion policy

Essential Functions: This position will serve as the technical lead for the new and evolving video systems within the Judiciary, and will be assigned to monitor and administer the Judiciary's wide area network as it relates to video conferencing systems, as well as handle basic networking. The incumbent will apply knowledge and experience in networking, email, video-conferencing and related systems to support the development, deployment and management of evolving IT systems. Responsibilities will include: arranging technical set-ups utilizing audio and video conferencing technologies; providing a/v and technical support for training sessions/meetings statewide; providing training and customer support in the operations of video conferencing; troubleshooting user issues with hardware, software and the network; configuration and deployment of routers and switches and monitoring and supporting systems development by analyzing systems utilization, abilities, limitations and other characteristics.

Education: Bachelor's degree from an accredited college or university in Information Technology, Computer Science, A/V Science or a related field.

Experience: Three years experience in wide area network administration, systems support, troubleshooting, or other related skills to include working knowledge of video teleconferencing.

Note: Additional work experience as specified above may be substituted for the education requirement on a year for year basis.

Preferred: Preference given for Industry certification in A/V production systems or software or current certification in Networking, Windows servers, or related systems.

Skills/Abilities: Understanding of Networking and Operating Systems, especially Windows servers and Unix. Experience working with Video Teleconferencing, QOS, Multi-casting, current Polycom devices, Network Operating Systems (NOS), especially TCP/IP and Novell. Advanced knowledge of Cisco routers, switches and MCU and Video on Demand devices. Ability to work in an R & D environment, where change and multiple assignments are common. Demonstrated creative problem solving and troubleshooting which illustrates ability to take a global approach and to successfully apply alternative solutions to most systems problems. The ability to work with other professionals in a team environment is essential. Ability to perform all of the essential functions of this position.

Please submit a Maryland Judiciary employment application (unsigned applications will not be accepted) or resume and cover letter stating position title. Materials must be received at the address below by 5:00 p.m. on the closing date. The Human Resources Department does not accept faxes and will not be responsible for applications/resumes sent to any other address.
